Name..... Date.....

A) Find the missing numerator to write the equivalent fraction. Remember that you are only multiplying or dividing. Don't try to add or subtract, or you'll get the wrong answer!

1) $\frac{2}{11} = \frac{4}{22}$

2) $\frac{1}{9} = \frac{10}{90}$

3) $\frac{3}{4} = \frac{9}{12}$

4) $\frac{5}{10} = \frac{50}{100}$

5) $\frac{6}{9} = \frac{60}{90}$

6) $\frac{7}{10} = \frac{56}{80}$

7) $\frac{8}{10} = \frac{56}{70}$

8) $\frac{1}{5} = \frac{10}{50}$

9) $\frac{3}{5} = \frac{9}{15}$

10) $\frac{10}{11} = \frac{50}{55}$

11) $\frac{2}{7} = \frac{8}{28}$

12) $\frac{8}{11} = \frac{16}{22}$

13) $\frac{1}{5} = \frac{7}{35}$

14) $\frac{5}{11} = \frac{35}{77}$

15) $\frac{5}{6} = \frac{25}{30}$

16) $\frac{1}{3} = \frac{6}{18}$

17) $\frac{1}{3} = \frac{2}{6}$

18) $\frac{11}{12} = \frac{44}{48}$

19) $\frac{2}{3} = \frac{10}{15}$

20) $\frac{2}{7} = \frac{16}{56}$
